

**METHODS AND APPARATUS FOR CONTINGENT TRANSFER AND
EXECUTION OF SPOKEN LANGUAGE INTERFACES**

Abstract of the Disclosure

A method for managing spoken language interface data structures and collections of user interface service engines in a spoken language dialog manager in a personal speech assistant. Interfaces, designed as part of applications, may by these methods be added to or removed from the set of such interfaces used by a dialog manager. Interface service engines, required by new applications, but not already present in the dialog manager, may be made available to the new and subsequently added applications.
